

CT-H02

Multi-Use Studio-Grade Headphones

TEAC®

PRODUCT DESCRIPTION

TEAC's new CT-H02 closed-back, stylish headphone deliver a sound you have to hear to believe, and at a price that can't be ignored. TEAC spent over a year comparing technologies, designs and methods to provide an amazing \$100 dollar headphone for less than a third of the cost. The CT-H02's are based off of the already proven headphones released under TEAC's Pro Audio Division, TASCAM. CT-H02 users can be assured that the quality they're receiving is even good enough for the pros.

The sensitivity and frequency response of the CT-H02 deliver clear balanced sound to fit all favorite tunes, regardless of genre or application. These high-powered headphones produce pristine highs, clear mid-range, and rich low end where most other headphones leave one yearning for more. TEAC understands that just as important as the sound of ones headphones is a clean modern design and comfort. Featuring plush cushioned ear cuffs and a padded headband; CT-H02 can be put to work for hours of comfortable use. Both left and right ear-cuffs offer full 90° rotation, making CT-H02 flexible to wear when listening to favorite albums, tracking for hours or performing all night. The folding design of the CT-H02 and included leatherette bag allows compact fit wherever they need to go.

TEAC's CT-H02 headphones can easily be a part of one's everyday accessories but also fit into a recording or performing workflow. Don't just hear with any pair of headphones; truly listen to the details of music and media while enjoying comfort and flexibility. With the CT-H02 headphone, TEAC (as always) has delivered first-class quality, style and design at a price everyone can appreciate.
